Summary

Systems and Computing Engineer with experience in application development, process automation, and business-oriented technology solutions, with a strong focus on Power Platform and Artificial Intelligence. I have worked in corporate environments, leading and contributing to the design and implementation of solutions using Power Apps, Power Automate, Dataverse, SQL, and Python within the Microsoft ecosystem, driving process optimization and improved operational efficiency. Additionally, I have a background in full-stack development using technologies such as React, Node.js, and Django, which allows me to build end-to-end solutions. I am passionate about technological innovation, especially in Generative AI and RPA (Robotic Process Automation), and I focus on developing scalable, user-centered, and high-impact solutions. I consider myself proactive, detail-oriented, and committed to continuous learning.

Professional Experience

Teleperformance (May 2025 - Now)

Process Excellence Analyst II

- Development and management of business solutions focused on process automation and optimization.
- Design and implementation of applications using Power Apps and automations with Power Automate, integrating Dataverse, SQL, Microsoft Teams, and other Microsoft tools.
- Addressing operational and business needs through functional solutions that enhance productivity, tracking, and process control.
- Exploration of development alternatives using Django and initial approaches to RPA-based automation.

Banco de la República de Colombia (July 2024 - December 2024)

Technology Architecture & Innovation Intern

- Updated enterprise architecture indicators and diagrams, improving technological planning and structuring.
- Developed and maintained applications using Python and Microsoft Office 365 tools (Power Apps, Power BI, Power Automate).
- Supported technology architecture and innovation initiatives, collaborating on strategic projects.

Education

Universidad Católica de Colombia

Systems and Computing Engineering

2020- 2025

Certifications

- **NDG Linux Essentials** – Cisco Networking Academy (2022)
- **Generative AI with ChatGPT and Azure** – Udemy (2024)
- **Generative AI with Midjourney, ChatGPT, and other AIs** – Udemy (2024)
- **Web Development** – Platzi (2025)
- **AI Tools for Developers** – Platzi (2025)
- **Web Development Bootcamp** – Udemy (In Progress)
- **Machine Learning & Data Science with Python** – Udemy (In Progress)
- **Django: Build Robust Web Applications with Python** – Udemy (In Progress)

Languages

English – B2 (Certified, Open English, 2020)

Additional Experience

Work and Travel – USA (2023 – 2024)

Software skills

Programming Languages (Python, JavaScript, TypeScript, Java, Kotlin, C++, SQL).

Web Development & Framework (React, Node.js, Django, HTML, CSS, WordPress, Hostinger).

Databases (SQL Server, PostgreSQL, Dataverse).

Microsoft & Power Platform (Power Apps, Power Automate, Power BI, Azure).

Version Control & Design Tools (Git, GitHub, Figma, Visual Studio Code).

Automation & Applied AI (n8n, RPA, Codex, Antigravity, Claude Code, Stitch, NotebookLM).
